

Streamlining Consumer Lending

Rogue Credit Union transforms consumer lending by integrating MeridianLink® Consumer and their loan application software with Glyue™ from Sandbox Banking.

The Challenge

Rogue Credit Union has a long history of providing exceptional member service and support. However, they were faced with the challenge of digitizing their consumer lending operations to meet increasing member expectations.

Rogue uses MeridianLink® Consumer for end-to-end digital lending and account opening, alongside a separate loan application system. Together, they are designed to simplify and modernize the entire loan process by providing tools that enable borrowers to apply online, submit necessary documents electronically, and monitor the status of their loan application. The systems also offer features for compliance, data verification, and credit reporting, reducing the risk of errors and the need for extensive manual review. But they weren't working together.

In order to make things work more smoothly, Rogue Credit Union needed to integrate both systems to streamline operations, reduce duplicate and manual tasks, and ensure strict compliance with ever-changing regulations. By choosing Integration Platform as a Service (IPaaS) Glyue™ powered by Sandbox Banking, Rogue Credit Union was able to build a better lending process for members and for their own team.

"The team at Sandbox Banking is fantastic. We had a pretty challenging project, and they were able to find creative solutions to ensure the best possible outcome with every issue we encountered. The customer service was above and beyond what we've grown accustomed to with vendors, and that made every bit of difference in the success of our project."

Rob Overton

Senior Vice President of Consumer & Mortgage Lending, Rogue Credit Union

Founded: 1956 by a small group of educators in an elementary school cafeteria

Areas served: Oregon and Western Idaho

Asset base: \$3B+

Members: 207,000

The Process

The successful integration of MeridianLink® Consumer and the loan application system with Glyue™ followed a structured plan with several key steps:

- **Needs assessment:** Rogue Credit Union conducted a comprehensive assessment of their existing consumer lending process, identifying inefficiencies and areas for improvement. They engaged with MeridianLink®, the loan application vendor, and Sandbox Banking to explore how these platforms could address their specific requirements and provide the needed business goals.
- **Customization:** The MeridianLink® and loan application vendor teams worked collaboratively with Rogue Credit Union to customize the platforms to match their unique processes and compliance needs, ensuring a smooth transition for both staff and members.
- **Project management and implementation:** Sandbox Banking worked closely with Rogue to navigate complexities with both systems. They examined structural elements, performed debugging exercises, and reviewed schematics with meticulous care in order to ensure a successful implementation that met the goals of the project.
- **Training and onboarding:** Once the system was ready to go, Rogue Credit Union provided extensive training for their staff to ensure they were proficient in using the integrated system. This critical step aimed to achieve high adoption rates and a seamless transition.
- **Member outreach:** Rogue Credit Union engaged in a strategic member outreach campaign to inform and educate their clientele about the new and improved consumer lending process. This not only ensured a smooth transition for members but also showcased Rogue's commitment to their financial well-being.

The Results

The successful integration of MeridianLink® Consumer with the loan application system via Glyue™ yielded significant benefits:

- **Improved efficiency:** The lending process was streamlined, reducing the time required to process applications, underwrite loans, and disburse funds.
- **Enhanced member experience:** Members enjoyed a more user-friendly digital lending experience, with an improved ability to apply for loans online, submit documents electronically, and track their loan applications in real-time.
- **Fortified compliance:** By integrating, the platforms facilitated strict adherence to regulatory requirements, reducing the risk of compliance errors.
- **Data accuracy:** Automation and data verification features reduced manual entry and errors, improving data accuracy throughout the lending process.
- **Staff productivity:** Because manual tasks were minimized, staff was able to focus on more value-added activities such as member support and loan decision-making.
- **BONUS:** The experience with the Sandbox Banking team was so remarkable that Rogue Credit Union is looking at opportunities to integrate more systems using Glyue™.
